

24/7 OT Cybersecurity Support with Mission Secure Managed Services

IT and OT expertise to manage your cybersecurity program or augment your existing team to stop OT cyber threats head-on.

Monitoring the health status of all devices in your OT network as your eye in the sky.

As an add on to the Mission Secure Platform, our managed services team ensures your OT and ICS networks are locked down no matter where you stand in your OT security program.

Skills and Expertise

With over 200+ years of combined OT and IT cybersecurity expertise, our team is positioned to support as needed – whether on a consultative basis or taking a primary role in keeping your OT networks secure.

Technology and Tools

With the Mission Secure managed services team, our state-of-the-art technology and tools enable real-time response and support. Our geographically dispersed, redundant SOCs help minimize disruption and eliminate threats.

Methodology and Approach

Every Mission Secure solution, including our managed services, has been put to the test – all of our devices are utilized and trusted by our own team. You can rest assured that the devices you use, the managed services team you trust, have all been well trained and tested.

Certifications

Mission Secure's managed services team brings together experts from ICS, OT, IT, cybersecurity, and ethical hackers. Certifications include:

- ✓ Certified Information Systems Security Professional (CISSP)
- ✓ GIAC Cyber Threat Intelligence (GCTI)
- ✓ Certified Cloud Security Professional (CCSP)
- ✓ Certified Ethical Hacker (CEH)
- ✓ And many more

Managed Visibility For All Assets

Our managed support offers a set of eyes that see every point of entry and device on your OT network — alerting customers to any rogue connection or drop-offs.

- ✓ Accurate visibility graph
- ✓ Asset customization and labeling
- ✓ Continuous OT asset and communication monitoring

“

*Especially in the OT environment, cybersecurity resources and expertise are scarce, and it impacts our clients around the world. With Mission Secure Managed Services, we take on this burden, supporting our clients every step of their journey — **making the path to OT cyber-protection easier and financially feasible.**”*

Don Ward, SVP Global Services, Mission Secure

Proactive Managed Protection

Knowing what to block starts with 24/7 continuous remote OT coverage that protects against intrusion and weakness.

- ✓ Analysis of your current network
- ✓ Critical insight on traffic patterns
- ✓ Baseline data for existing traffic profiles
- ✓ Implement and maintain best practice protections
- ✓ Mitigating controls for unpatched vulnerabilities

MISSION SECURE MANAGED SERVICES

Managed Analysis and Hunting
